of STATIONERS, 1686.

\*\*\*\*\*  
To the Loyal and Intelligent Reader.

**L**ET it not either amaze or amuse thee that I came forth this Year after a different manner from what in many Years formerly I was wont, I mean without Predictions, &c. Good things may be abused, and ignorant, or malicious People are apt to take things by the left handle: And such hath been the fate of Astrological Predictions.

Besides, I am given to understand, it is the Pleasure of our Superiours that we forbear that part of Astrology at the present; unto which I most readily pay Obedience.

Astrologers have a large field to walk in; all the Productions of Time being the Subjects of their Science. And there is nothing under the Sun but what is the Birth of Time —. Howbeit, let me humbly presume to affirm, That the Stars this Year (and several Years yet to come, nay, I hope for ever.) are at an absolute Enmity with the Enemies both of Church and State, and as plainly declare the destruction of the Persons and Fortunes of such as shall oppose either, as they lately did the Confusion and Ruine of the Rebels Army in the West; than the which there was never any Prediction more plain and fatal. I am thine,

Brick-Court, by the  
Deans-Yard, Westminster.

JOHN GADBURY.

*Of the Lunar Eclipse this Test, 1686.*

IN this Year of 1686, there will be four Eclipses of the two great Luminaries of Heaven, viz. Two of the *Sun*, and two of the *Moon*: yet but one of them visible unto us. So that the *Ephemerides* for XX Years takes only notice of that, and passes those invisible.

The first will be of the *Sun*, on *May* the 12th, about 7 of the Clock in the Morning, but for sundry reasons, as the *Moons* Parallax, and her apparent Latitude, are greater than the Sum of the *Sun* and *Moons* Semidiameters, &c. will not be visible in our Hemisphere.

The second will be a *Lunar Deliquium*, on *May* the 27th, at, or about 11 of the Clock before Noon, as by the distance of the *Moon* from her Node appears, which is but 7 degrees, not quite so much. This will be invisible to us.

The third will be an Eclipse of the *Sun* on *November* the 5th, at 10 a Clock at Night, and therefore not to be seen by us in *Great Britain*, &c.

The last will be a visible and total Eclipse of the *Moon* on *November* the 19th, about 11 of the Clock at Night, worthy the Observation of all the Sons of *Dramiah*. It is celebrated within few degrees of that glorious Star called *Aldebaran*, who marches itate y (to our Eye at least) before the Eclipse toward the West; very pleasant to behold.

Thus much of Eclipses this Year.

¶ There will in this Year also happen a famous Conjunction of ♀ and ♂ in ♋, an Equinoctial sign. 'Tis a Celestial Congress that happens very rarely, and therefore the more worthy our notice in its Motion and Effects. For —

*The Sun, Moon, and Stars praise God. Psal.*

# The Vulgar, or Common Notes of the Year 1686 explained.

A further Explanation of these Feasts, &c. may be the  
 business of another Year; wherein I may possibly meet a bet-  
 ter Liberty and Fairer Opportunity for so tremendous and seri-  
 ous a Work. And probably also I may consider of the  
 Reasons why such differences happen about the falling of  
 Easter, as commonly do; and (with submission to my Super-  
 iors) teach how such Differences may be accommodated, as  
 well for the Honour of God, as the Church and State. But  
 for this time I am limited, and can say no more at present.

Certain

Certain days prefixed for all Sheriffs, Bayliffs of Liberties, and other Accomptants, to come to their respective Accompts in the Exchequer.

# February hath XXVIII Days.

No more the Ides of *March* we'll fatal call,  
 Since *February's* Ides brought *Charles* his Fall.  
 With Purging, Bleeding, Fire, he did endure  
 More Pain than *Cæsars* Bodkins could procure :  
 Whose Death would drown's in Tears ! but that Relief  
 From Royal *JAMES* exterminates our Grief.

Lunar Months.

Observations.

4. Purification B. M. vulgarly called *Candlemas*, is celebrated in remembrance of the blessed Virgins observing the law of *Moses*, enjoyn'd unto all Women after Child-bearing. Who (tho she might have pleaded a Priviledge above other Women, as having had the honour to bear the only Son of God, our blessed Saviour) yet submitted unto the Levitical Law, even as the meekness of her Sex.

6. d. Our late gracious Sovereign King *Charles* the II. departed this mortal life. At which time our present Sovereign King *James* the II. began his Reign, and was proclaimed then in *London*, &c. with universal Joy.

14. c. St. *Matthias*.

This St. *Matthias* was elected by Lot on this day to be one of our Saviour's Disciples, in the room of *Judas* that betrayed, and sold him to the Jews for Money.

March hath XXXI Days.

Grim *Chronus* retrograde, confronts the *Sun*,  
As *Mars* doth *Jove* before the Month be done.  
Sly whiggish *Hermes* at his Guardian lowers,  
VVhile *Jupiter* he courts, hoping his Powers  
May's Protean Shifts protect: But *Sol* and *Mars*  
Him Prisoner make; and so ends this Month's Jars.

25<sup>d</sup>. The Annunciation of the B. V. This day is observed in an honourable remembrance of that Divine Message brought unto the blessed Virgin by the Angel *Gabriel*, viz. That she should conceive in her Womb, and bring forth a Son, whose Name shall be called JESUS.

The Holy Feast of Lent, begins commonly in this Month, and is observed by all pious Christians in commemoration of our Saviour's fasting forty Days and Nights in the Wilderness.— It is also observed to other purposes for the common good of Mankind; as many very learned both of Ancient and Modern Times have written; but to mention all the uses hereof must be the work of another Year.

April bath XXX Days.

St. *GEORGE* for *England*! and Just *JAMES* the same,  
*Dragons* and *Tygers* they both have made tame!

S. *GEORGE* but *One*, King *JAMES* a *Million* found !

All, by his Courage, groveling on the ground.

And, guarded by that Power by whom Kings reign ;

Low let him keep 'em, ne're to rise again.

May hath XXXI Days.

What? shall great *CHARLES* his Exit make, and I  
Not fight a Line for's Sacred *ELEGY*?

'Twas fragrant *MAY*-produc'd this glorious Prince!

'Twas frosty FEBRUARY fnatch'd him hence.

Oh ! let him shine in Heaven a glorious S T A R !

And when we die, attend upon him there.

Observations.

1 d. St. Philip and St. Jacob.

This day is by the Church dedicated to the Memory of St. Philip and St. Jacob, or James. There were two Philips, one a Deacon, another an Apostle: The Apostle is the Person intended here. St. James wrote the Epistle which passeth under his Name.

The holy Feast of Pentecost. This fallsth commonly in May, as in this Year. Of it's Original, vid, my Easter Table before mention'd.

29 d. King Charles the II. born, and restored. In remembrance of so good and pious a Prince, the Church commands this day to be kept as a publick Thanksgiving to Almighty God, for so great a Blessing as he proved both to the Church and Nation.

# June hath XXX Days.

And are the Stars for Signs & sure then they be  
Significant of some Futurity.

Thus Saturn Square to Sol, bad Air creates  
And Punishment to ill projecting Dates.

VWhile Mars his Time to Fame begets Renown,  
To some that bare the Sword, and wear the Crown.

Observations.

11 d. St. Barnabas, Apostle.  
One of the XII Apostles of our  
Lord, whose Death is commemo-  
rated on this day by the Church.

24 d. St. John the Baptist,  
He was the *πρόδρομος*, or  
forerunner of our blessed Sa-  
viour, and of whom he was  
baptised in *Jordan*. The Church  
hath commanded to keep this  
day holy in remembrance of him.

29 d. St. Peter and St. Paul,  
Apostles.

This day is dedicated to the  
memories of both these blessed  
Apostles, for that on this day  
they were both put to death for  
the Truth of Jesus. St. Peter,  
by being crucified with his Head  
downward, (to difference his  
dying from that of our Saviour)  
St. Paul, by being beheaded.

B

# July hath XXXI Days.

A rugged Month for Harvett; 'tmakes me fear  
Some Storms will shake the heavy-laden Ear.  
Tempestuous Dog-days! th' Planets out of tune!  
And many pretty Ladies brought to Ruine.  
But that's not all; the Signs in *Leo* too!  
Our Demi-Gods are emulated now.

Lowest Aspects.

Observations.

25 d. St. James the Apostle.

He is noted by *Eusebius* to be the first of all the Apostles that suffered Martyrdom, and the boldest and most courageous among them; and was therefore killed by them. *James* the Great is also to distinguish him from another of that Name. The Church appoints this day to be kept holy in remembrance of this great Champion of the Faith of Christ.

The Dog-days are said to begin on the 1<sup>st</sup> of this Month, and end on the 27<sup>th</sup> of August: But some learned Physicians are of opinion, that

*Canis non morde in Anglia.*

B 2

# August hath XXXI Days.

Mellifluous *Venus* in her tropick height.

Receives great *Jove's* Addresses in that State:

The Congress is proliſtick! glorious!

Breaths nought but Love and heavenly care of us:

And (might my Muse propheticke prove) Ide' swate

Some Royal *Prince* (perhaps of *Wales*) draws nea

Roman Account.

English Account.

Observations.

St. Bartholomew, Apostle.

On this day the Church com-  
 mands us to celebrate the Feast  
 of St. Bartholomew. He was by  
 Birth a Syrian, and a Nephew  
 to a King of Syria, who some-  
 time have reported him a Jew; and  
 a Fisherman by his Profession.  
 He preached the Gospel of his  
 Master, and our Saviour, many  
 years in several places, but at  
 last is taken by his Enemies and  
 excoriated, or flayed alive; so  
 hanging upon a Cross until the  
 next day, they then take him  
 down therefrom, and end his  
 Torments by cutting off his  
 Head: Whence some call this  
*Festum duplex*, a double Festival,  
 and commemorate his Suffer-  
 ings upon the 25th day also.

B. 3.

# September hath XXX Days.

Three close Conjunctions of the errant Stars  
*September yields, and all in Libra's Sign;*  
*Which bring Impeachments, Accusations, Juts,*  
*'Mong sandy grumbling Trimmers, who repint*  
*At England's growing Peace and Happiness:*  
*But Justice does such Follies soon redress.*

-------------------------------------	---------------------------------	-------------------------------------	--

October hath XXXI Days.

**F**ore *sexriles Venus* from a Fecund Sign,  
 While *Mars* with the Queen of Lucredoth joyn  
 In the Celestiall Virgin, *Lawha* may can  
 Bring *Cupid* forth, *Quills* when I rind to Man.  
 Happy *compositions*, happy *Birhs* create!  
 Chini-jealous *Chronos*, ma's the married State.

[illegible]

October, 1686.

New Moon 9 day, at 8 morning.  
First quarter 14 day, at 7 morning.  
Full Moon 21 day, at 7 morning.  
Last quarter 29 day at 7 morning.

Roman Account.  
English Account.

Observations.

18 d. St. Luke the Evangelist.  
The Church commemorates the Feat of St. Luke on this day. He was a Physician by Profession, and Native of *Antioch*. He wrote the Gospel under his Name.

Our most Gracious Sovereign King CHARLES II. was born the 29th day. 1633.  
*Dr. Sparrowe* was Master of *St. Peter's* School.

*Imperium* *Udo* 9, *Samam* *qui* *ter* *minet* *Alors*.

28 d. St. Simon and St. Jude, Apostles.

The Church preserves the memory of these two holy Apostles on this day, who by Blood, (as well as by Caelestial Relation) were Brethren. They both preached the Gospel of their Master, and at last are taken imprisoned, and put to death for the same.

# November hath XXX Days.

Great *Jove* in *Sagittary* meets the *Sun*,  
Near th' *Scorpion's* Heart, with nimble *Mercury*;  
Presaging some great Matters to be done;  
But to say what is much unfit for me,  
In case I knew't. Affairs of Church and State  
Fit best the Learned-awful Magistrate.

21 November, 1686, 1230

New Moon 5 day, at 10 at Night.  
First quarter 12 day, at 4 Afternoon.  
Full Moon 19 day, at 11 at Night.  
Last quarter 28 day, at 14 Morning.

Roman Account.  
English Account.

Lunis, Apr 25. Observations.

14. The Feast of All-Saints.  
On this day is celebrated that  
*Festum Catholicum*, or Feast of  
All-Saints universally; as well  
of the Sons of God already in  
Heaven, as of the true Servants  
of the Lamb in the Church Mi-  
litant here on Earth.

November 5th is observed by the  
Church in remembrance of our de-  
viances from the horrid Powder-plot  
1605.

15 d. Our gracious Q. Kath-  
arine, Dowager, born upon this  
day at Lisbon in Portugal.

30 d. St. Andrew the Apostle.  
The Feast of this blessed Apostle is  
celebrated on this day. He is by some  
styled, — The First-born of the New  
Testament. He was by his Profession  
a fisher-man, and our Saviour called  
him from that Employment to be a  
father of Men, viz. to bring the Souls  
of Sinners over to God for Salvation.

December hath XXXI Days.

The Planets call a Council! most appear  
In quadrate Aspect to conclude the Year.  
The VWeather's Various, so are People too;  
Still finding fault with what their betters do.

A tickly season hastens on apace.

Thus have I run a bluftring XII month's Race

December 1886

New Year 5 day, at 9 morning.

First quarter 12 day, at 1 morning.

Full Moon 19 day, at 5 evening.

Last quarter 27 day, at 10 at Night.

Roman Account.  
English Account.

Observations.

St. Thomas the Apostle.  
St. Thomas had the Title of *Apostle*  
*Indiarum*, the Apostle of the *Indies*, and preached the Gospel to the  
barbarous Heathen, who, at last put  
him to death, that laboured to bring  
them to eternal Life. The Church co-  
mends his memory on this day.

St. Stephen the first Martyr, or wit-  
ness of our Saviour and his Miracles,  
preached to the Jews the Doctrine of  
salvation, and they destroy him under  
pretence of being a Blasphemer.

This was the Disciple whom Jesus  
loved: he wrote his Gospel at *Ephesus*.  
And on this day the Church commands  
to celebrate his Festival.

On this day is remembered by the  
Church the Martyrdom of the holy  
Innocents, who were put to death by  
*Herod*, in hopes thereby to have de-  
stroyed our Saviour.

God's Mercies for Mounts Man's

# The REGAL TABLE.

From the time that ENGLAND was first so called by King EGBERT until 1686.

KING's Names.		Reign began	Reign ended	KING's Names.		Reign began	Reign ended

25	Henry 2.	1154	35				

Stand there Great JAMES! no more presumptive Heir!  
But just Possessor of the REGAL CHAIR.

Three glorious Nations now affirm your Right;  
And bid all bold EXCLUSIONERS good night.

The Trimming Tribe would be true Subjects reckon'd;  
And deign to drink a Health to JAMES the Second,  
Whom God long preserve. Amen.

*Dormit aliquando Lex, moritur nunquam.*

Justice is blind, yet holds the Scales-most even:  
 The equal Balance is, on Earth, a Heaven:  
 And, God-like Judges ne're desire to know  
 How Plaintiffs, or Defendants Cause doth go,  
 Till both appear before them; then they try  
 Th' Oppressed's Right, and put the Oppressor by.

THE GOVERNMENT OF THE MOON over  
the Body of Man, as she palleth the twelve ZODIACAL  
CONSTELLATIONS.

A DYSTICH of the Twelve Signs, and of  
their several Significations.

I. II. III. IV. V. VI. VII. VIII. IX. X. XI. XII.

Head, Throat, Arms, Breast, Heart, Belly, Reins & groins,

Legs, Feet, Thighs, Knees, Legs, and the active Feet.

♄ Saturn.	☉ The Sun.	☾ Luna.
♃ Jupiter.	♀ Venus.	♈ Dragons Head.
♂ Mars.	☿ Mercury.	♏ Dragons Tail.

The Characters of the five Aspects.

♄ Conjunction.	♄ Opposition.	♈ Trine.
♄ Sextile.	♄ Square.	♈ Quarte.

When I consider the Heavens, the Works of thy Fingers, the  
Sun, Moon, and Stars which Thou hast ordained, what  
Man that Thou art mindful of him?

A Table of the Essential Dignities of the Planets, according to Ptolemy.

Explanation of this Table.

By this Table you will find that ♀ and ♀ are the Houses of ♂. And ♂ and ♀ are the Mansions of ♀. ♂ is assigned to ♀ and ♀, and ♀ hath Domal dignity in ♀ and ♀, and ♀ his in ♀ and ♀: All the rest is understood by the Titles of each Column.

A Planet in his House hath 5 Dignities. In his Exaltation. In his Triplicity 3. In his Term 1. In his Decanate 1. The Detriments of the Planets are opposite to their Dignities of House; and the Falls are opposite to their Exaltations.

How to set a Figure of Heaven for any time, Day or Night, for ever.

**H**E that would learn to set a Figure truly, must know there are Seven Planets constantly moving in the Heavens; and that the Zodiack in which they move, is a Circle, which contains the Twelve Signs through which they constantly are passing. The Characters of each Planets and Signs I have taught you to know under the Anatomy of Mans Body, placed at the end of the Second Sheet of this Book: so that I need not do it here again —

These things being first known, you may learn to set a Figure by the foregoing Table of Houses, thus; viz.

First draw with your Pen or Pencil a Figure of XII Angles, equal to the XII Signs mentioned, with a space in the middle, as you will see by that which follows, by way of Example.

Secondly, Consider the time you would set your Figure unto: which done, seek the Sun's place at Noon in the *Ephemeris* the day you would set your Figure for, and therewith enter the Table of Houses under the Sign the Sun is in, under the Columne of the XII House, and against the Degrees of the Sun to the Left Hand under the Title, *Time from Noon*, you will find certain Hours and Minutes; unto which, if you add the Hours and Minutes of the Day for which you would set your Figure (reckoning your Day, with Astronomers, from Noon to Noon), the Product of both Numbers (except it exceed Twenty Four Hours) is to guide you in the same Columne, under the Title, *Time from Noon*, until you find your Number; against which, when found, in the Colateral Columne, you will find the Cuipe of the six Oriental Hou-

# Astrological Observations 1686.

Houſes objected to your view; viz. the 10, 11, 12, *Aſc.* 2, 3. The fix Occidental Houſes are always oppoſite in Signs, Degrees, &c. But if the ſum exceed 24 hours, then muſt you caſt away 24 hours, and the remaining Number ſhall always be your guide.

To put this by a Practical Example.

Suppoſe it be required to know in what Figure the Heavens are poſited at One of the Clock P. M. or Afternoon, this preſent January, 1686. I firſt ſeek the place of the ſun in the *Ephemeris* before-going, on that Day; which I find to be (nearly vs 22 Degrees. I therefore enter the Table of Houſes under ☉ in vs the place of ☉), and in the Column of the 10th Houſe againſt 22 Degrees, to the Left Hand, under the Title, *Time from Noon*, I find 19 h. 35 m. unto which Number I add One Hour, the time of the Day I would ſee my Figure for, and the aggregate of the ſum is 20 h. 35 m.

— which is my guide. — Now I ſeek for this Number in the ſaid Column of *Time from Noon*, and the neareſt unto it (going forward) is 20 h. 34 m. againſt which Number I find all the Cuſps of the fix Oriental Houſes, thus in the Collateral Column: viz.

The Cuſps Collected, thus:

10	11	12	<i>Aſc.</i>	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊
♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊

The next thing is to enquire how the Planets are poſited on the ſaid firſt day of January. 1686. whoſe places by the foregoing *Ephemeris* are thus:

☉	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂
21	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52	52
♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓	♈	♉	♊	♋

The

**The Figure follows.**

Now to set the Planets in the Figure, you must always observe this Rule; viz. If your Planet be in more Degrees than the Cusp of your House, you must place him behind, or within your Cusp - but if he be in fewer Degrees than the Cusp, then he must be placed before; as you see here done in this Figure.

¶ Whereas you find the 8 placed in the VIIth Angle, you must know, that 8, the *Dragon's-Tail* is always opposite to 88, the *Dragon's-Head*.

### Note

**Note** also. That if you are to set a Figure for 3, 4, 5, 6, or 7. Hours Afternoon, the *Moon* will require some Addition to be made to her place at Noon, by reason of the swiftness of her motion, which according to her mean Motion (being about Twelve Degrees in a Day) is 30 Minutes in an Hour. And so by an Addition in the Afternoon, or of Subtraction in the Forenoon, to or from her place at Noon, you obtain her place true enough in all manner of Ordinary Matters or Questions. But if you would set Figures for *Nativities*, &c. you ought then to learn *Regiomontanus* his *Rational way for Erecting your Figure*, &c. Or else you may learn to set a Scheme by the Tables in my *Dockrine of Nativities*, published Anno 1658.

Thus much I thought convenient for the young Learners first Instruction. In process of time, and by degrees, I may lead him on to the understanding of more curious and profitable matters in this most Excellent, but too much abused Learning.

*The heavens declare the Glory of God, Psal. 19.*

*A Description of the Four Seasons of the Year.*

*I. Of the Spring.*

**THE Spring** the most delightful Season of the whole year, taketh its beginning from the *Sun* his entering into the Equinoctial Sign *Aries*, which in this year 1686. happens on *March* the 9th day, at 13 hours, 48 minutes Afternoon: or, more vulgarly, at 1 hour, 48 minutes in the morning, on the tenth day, at which time the Coelestial *Sagittary* attends the Horoscope in the Latitude of *London* in particular, and near the same time generally all over *England*.

This glorious season continueth all that time the *Sun* passeth thorow the three first Northern Signs; viz. *Aries*, *Taurus*, *Gemini*.

At the beginning of this season the *Sun* maketh the Days and Nights equal all over the world; and leaving then the Inhabitants of the *Southern Hemisphere*, doth now refresh and revive with his cherishing beams all those that dwell and inhabit in these *Northern* parts of the world. The *Astronaitick* Rulers of this Quarter, are *Mars*, *Venus* and *Mercury*; and they naturally signify Vigor, Delight and Mutability. And accordingly while the *Sun* is in *Aries*, all Vegetables put forth their Leaves and blossoms, and Nature shews a *Spring-like* force in all her Operations. While the *Sun* continues in *Taurus*, the Leaves and Flowers expand themselves after a delightful manner, and Dame *Vesta* opens her Paradise of Pleasures to all her Children, and therewith exercises both their souls and senses. All the time he is in *Gemini*, Natures Limners are at work, and out of the force or vigour of *Mars*, and delights of *Venus*, paint to the world a Million of pleasing Varieties, that Mankind may thereby be taught how to abate of his stock of Melancholly, by contemplating those glorious, but harmless pieces of Natures Workmanship, and need not be beholding to the Conversation of treacherous Company, nor yet to an exhilaration afforded from a Tavern or Musick-house. The curious Emblems of the *Spring* are void of Fraud, and know not the Art of Trepanning Natures innocent Syrens, tempt none to the Rock of Destruction. *Ulysses* may here sit soberly, and without being bound to his Ship's Mast, may delightfully open his Ears to these Mellifluous Charms.

But now, as if God and Nature never intended that Mankind should be gluttied with the beholding of One Object continually, the glorious, amiable and youthful *Spring*, with all its Verdant Varieties, leaves us: And we must next approach unto

## II. The Summer Season.

THE *Summer* Quarter begins where the *Spring* ends, and the *Sun* here mounting his *Apogaeon* Chair of Honour, is removed to his greatest distance from the Earth, making the largest

largest quantity of Sun-shine, and least portion of shadow: or, (which is all one) longest days and shortest nights to us on this side the Equator.

This Season begins this year, in the Latitude of London, on June 11. near four a Clock in the Morning; and continues all that portion of time that the Sun maketh his progress through the three last Northern Signs, viz *Cancer, Leo, Virgo*: And the grand Rulers thereof, are *Luna, Sol, Mercury*. The Month here precedes the Sun in Government, and all the Births of the preceding Spring, are here swell'd into a pleasing Dropsie, and so continues for the first month of the *Summer*. And then the Sun assumes as well a particular as general power of Governing; and by his great heat, reduces all Vegetables from their Annual swelling, to a positive Heftick-Fever; thereby opening the Seeds of Flowers, Herbs, and Fruits, &c. and this is the work of the second Month of this Season. After this excellent office of the Sun performing, *Mercury* enters upon the Regency of the last Month of this Quarter, and (*Virgo*, his Dignity Denoting being an earthly Sign) he exalts all things from their natural condition, into a direct *Marasmus*. And now every thing being full Ripe, and the Corn ready for the Cycle, and for the honest Harvest Man's Levelling-hand; and the disease of this Quarter being become thus desperate, it is in vain to think to restore its wasted Spirits by Cordials; or to hope to retrieve its almost-decayed Life, by applying Pidgeons or Cupping-Glasses, or yet any other means.

Do You not see how orderly the Seasons of the year are governed by the several Planets in their turns! and this according to their Natures and Qualities, as Astrologers have distinguish'd their Dignities? And now having seen the death of the *Spring* and *Summer* Seasons, the only pleasant and delightful parts of the year; let us a little in the next place attend their Funerals, (that being the last office of kindness which one Friend can perform for another) which will be by considering,

III. *The Autumnal Quarter*

**T**HE *Autumn*, or Harvest Quarter, is the third Quarter of the year, and is the declining *Equinox* therein. The days and nights are now again equal all the world over, and the Sun doth irradiate the Artique and Antartique Pole with the same suitable respect as he did at the beginning of the Spring.

This Season begins where the *Summer* ends, viz when the Sun toucheth the first point of the Equinoctial sign *Libra*; which this year happens on *September* the 12 day, about 8 hours *P.M.* It continueth all the time that the Sun is perambulating through the Signs, *Libra, Scorpio, Sagittary*: and the Governors thereof are, *Venus, Mars, Jupiter*. *Venus* bestows her tears upon the Herse of the deceased *Summer*, and thereby generates a Phoenix out of the old ones Ashes; that so for the first of these Months we are made happy with a later Spring; but this out of any long continuance, but quickly fading and abating. Then *Mars* comes next, and endeavours to add heat to the moisture that *Venus* lent, the better to cherish the later *Summer*; but that too is soon return'd, by reason of the absence of the Sun, the fountain of all heat, and grand principle of generation. But lastly, *Jupiter* comes, and by his Balsamick Beams endeavours to perfect what *Mars* and *Venus* of themselves could not, and so conserves the Mummial vertue of all Plants, Herbs, Fruits, Flowers, &c. for the good of human kind, and for the preservation of the species of all things: at least to the end of this declining Quarter, which is as far as his Gubernation extends. And so leaves us in the next place to consider of—

IV. *The Brumal, or Winter-Quarter.*

**T**HE *Brumal*, or *Winter Quarter* always begins where the *Autumnal* Season ends; and Astronomically commenceth when the Sun salutes the first Scruple of the Tropick *Capricorn*, the Earth being then farthest deflected from the Sun's perpendicular Rays, receiveth greatest portion of shadow, and least quantity of Sun-shine, and so causeth shortest days and longest nights to all those that inhabit on this side the Equator. The

*Astrological Observations, 1686.*

Sun is in *Perigeo*, or nearest distance from the Earth, being now opposite to his *Apogæon*, which is *Isaac*.

This Melancholly Quarter beginneth this year on *December* the 1<sup>st</sup> day, at 8 a Clock in the Morning; and it continueth all that quantity of time the Sun is transiting through the Signs of *Capricorn*, *Aquarius*, *Pisces*. The Rulers hereof are *Saturn* and *Jupiter*; but *Saturn* hath a double power to that of *Jupiter*, because *Capricorn* and *Aquarius* are both his Signs or Mansion-Houses; and all things now look with a sad and unpleasant Face, and may be seen to wear the Image of Death or Destruction. Now Frost, snow, Hail, Thick-Clouds, Flocks, Barrenness, and extremity of Cold, and all things that are negative to Delight and Pleasure, have their Regency.

Thus you see how all the Seasons are made, and how by waging and contending Interest's maintain'd; and also how at last *Saturn* proves the devourer of his own issue; and how *Jupiter*, by his gentler moisture in *Pisces*, puts us in hopes of an approaching Spring.

And thus, by this orderly Rule of the Planets through the several Seasons of the year, are we put in mind of the several parts of our Life thereunto agreeable, viz. How we pass the Spring of our youth, the Summer of our Manhood, the Autumn of our declining years, and the Winter of our Age, where *Saturn* with his Cycle stands ready to cut us down; and how by passing thorow this vale of Misery, this Natural Death, we ascend to the Government of *Jupiter*, viz. to Immortality, and a blessed Life, where we shall behold the Face of God in Glory. But,

Oh! who shall tell! who shall describe thy Throne,

Thou Great THREE ONE!

There thou thy self dost in full presence show,

Not absent from the meaner worlds below:

No, if thou wert, the Elements League would cease,

And all thy Creatures break thy Natures Peace;

The

*Astrological Observations, 1686.*

The Sun would stop his Course, or gallop back.  
The Stars drop out, the Poles themselves would crack  
Earth's strong Foundations would be torn in twain,  
And this vast work all ravel out again,  
To its first Nothing. —————

*Comely.*

God preserve his Majesty, and His most Illustrious Consort Queen Mary, the most Religious Queen Katharine Dowager; their Royal Highnesses, Mary Princess of Orange, and the Princess Ann of Denmark, and all the Royal Family; Bless the Nobility, Gentry, Clergy, and Commonalty of this Realm, this year and ever. And thus much shall suffice for this year, 1686.

Brick-Court, by the Deans-  
Yard, Westminster.

JO. GADSDON

**A D V E R T I S E M E N T S.**

**A**stro-Meteorologia: Or, a Demonstration of the Influences of the Stars in the alteration of the Air, proving that there is not an Earthquake, Comet, Pareliz, Hale, Thunder, Storm, or Tempest, or any other Phenomena, but is referrible to its particular Planetary Aspect, as the Sub-solar cause thereof; A Work of vast Pains, Reading, and of many years Experience. By the Learned and Reverend Dr. Gualt. Sometimes Master of Merchant-Taylors-School, London. Printed for Obadiab Blagrove, at the Bear in St. Paul's Church-yard.

The true Plain and Golden Spirits of Scurvy-Grass, being highly approved for their Admirable Cures in the Scurvy, Dropsie, and several other general Distempers; are still faithfully prepared as formerly by Mrs. Hooker, Executrix of Mr. Robert Baseman, and sold by her at her House in Pauls-Clie, near Doctors Commons, London, and at many eminent Towns in the Country; they are also to be had with Printed Directions for their use. The Bottles are sealed with his Coat of Arms, the Half-Moon and Ermines, to prevent Counterfeits. Price One Shilling the Bottle.

**F I N I S.**
